

"A dedicated offer to e-retailers"

Our subsidiary Crosslog International: expert in the e-commerce supply chain

OUR ACTIVITIES

OUR EXPERTISE

LOGISTICS

> Do you want to outsource your order picking?

Receiving goods and inspecting packaging and products, product storage, PDA-assisted order picking, packing, processing of product returns, annual and continuous inventories

 Packaging & special services

Wide range of packages available, specific calibrations, guarantee strips, labelling, recommendations and support by our staff in designing and developing your packaging

Documents accompanying the order

Invoices, delivery notes, return forms, personalized cover letters, gift cards... in the desired language

TRANSPORT

 A comprehensive choice of delivery modes:

standard or express deliveries, to relay points, in stores, via messengers.

- Quality control service providers, transportation performance reports set up with all transporters. Permanent seeking the best partners for a given service
- Consistent information sent to your customers

- Monitoring and management of transport disputes by our services, anomaly detection
- Attractive prices through our transport experience, and a single contact, doing away with the need to negotiate with several different transporters

IT

> Do you want to communicate dynamically with your customers?

• CrossDesk: a unique interactive tool developed by Crosslog

 Monitoring and controlling logistic flows

Inventory tracking, incomings & outgoings, stock alerts, monitoring customers and supplier orders, returns management, publishing documents to be attached to the packages, activity dashboards

- Monitoring & controlling transport flows Carrying out your transport orders, shipping label editing, reporting & monitoring disputes, ordering consumables, unified parcel tracking whatever the transporter
- Communicating dynamically with your customers Keeping your customers informed about the progress of orders and deliveries via automatic email and/or sms in a unified way

CUSTOMER SERVICE

- · Providing dashboards for monitoring activity and quality indicators
- Measuring customer satisfaction
- Making our supply chain expertise available to audit and improve your logistics organization

Identifying dysfunctions, and setting up corrective actions

Let us handle your supply chain!
